Motion Design with Figma: Animations, Motion Graphics, UX/UI

Mohsin Amir

AI Developer & Product Designer | AI voice agents & automation that answer calls, book appointments & run workflows 24/7 | Also building multi-agent systems for startups | LangGraph & RAG • n8n • retell AI • vapi

Islāmābād, Pakistan

Summary

I build production-ready AI agents and design user-friendly AI products that actually ship — no abandoned prototypes.6 years UI/UX design + deep expertise in multi-agent AI development = I solve both the technical complexity AND the user experience problem most AI projects fail at.Trusted by: ILOVIT GmbH (Germany) • Tech ALPHAlogix • Startups across SaaS, e-commerce, automation What I Do:AI Agent Development: Build autonomous multi-agent systems (CrewAI, LangGraph, OpenAI Agents SDK, Autogen, MCP) that research, plan, execute, and improve without human intervention. AI Product Design: Design intuitive UX for complex AI products — conversational UI, agentic workflows, RAG interfaces. Make your AI simple enough that users don't need training. Production Deployment: Deploy scalable AI solutions on AWS, Azure, GCP with MLOps, monitoring, observability, guardrails. Full-stack: Bedrock, SageMaker, Lambda, Terraform, GitHub Actions. Proven Results:Built multi-agent SDR system generating personalized sales emails autonomously — reduced sales team manual work by 15+ hours/weekDesigned AI mood-tracking app (ILOVIT GmbH) improving employee emotional wellness metricsDeployed e-commerce RAG assistant driving 40% higher engagement vs. static recommendationsCreated autonomous research agents delivering reports in minutes vs. 3+ hours manual work Tech Stack:AI/ML: CrewAI • LangGraph • OpenAI API • Autogen • RAG pipelines • MCP Servers • Prompt engineering • Fine-tuning • Agentic loops Cloud/MLOps: AWS Bedrock • SageMaker • Lambda • S3 • CloudFront • Azure OpenAI • GCP • Terraform • Docker • GitHub Actions Models: GPT-4 • Claude 4 • AWS Nova • Llama • Open-source LLMs Design/Automation: Figma • Adobe Suite • n8n • User research • Prototyping • Usability testing Who I Work With:Startups building AI products, SaaS companies adding AI features, agencies needing AI automation, enterprises modernizing with agentic AI. If you're

stuck with: → AI prototypes that never reach production → Complex AI that users can't understand → Need someone who can DESIGN + BUILD the entire solutionLet's talk. Background:BS Computer Science (SZABIST) • AI Product Design Certified • Ed Donner Agent & MCP Engineering (2025) Open to: Freelance projects | Full-time opportunities | Consulting engagements Portfolio: behance.net/mohsinshah9

Experience

Upwork
AI developer
July 2025 - Present (1 year 5 months)

ILOVIT GmbH
3 years 10 months

AI Product Designer & AI Agent Developer
February 2023 - Present (3 years 10 months)
Germany

Building AI-powered products that combine intelligent automation with human-centered design.
Multi-modal AI Assistant Built conversational UI for internal AI assistant handling employee queries, document retrieval, and workflow automation using RAG architecture.
AI UX Research Conducted user research with 50+ employees to validate AI feature adoption and iterate on agent interaction patterns.

Artificial Intelligence Engineer
February 2023 - Present (3 years 10 months)
Berlin, Germany

Developing production-grade AI agents and designing user-centered AI product experiences for a Germany-based digital innovation company.

Core Responsibilities:
Agentic AI Development — Design and build autonomous multi-agent systems using CrewAI, LangGraph, and OpenAI Agents SDK that can plan, reason, and execute complex workflows independently.
RAG Pipeline Engineering — Implement Retrieval-Augmented Generation systems with vector databases (Supabase, Pinecone) for knowledge-grounded

AI applications. Configure chunking strategies, embedding models, and hybrid search for optimal retrieval accuracy.
AI Product Design — Create intuitive UX/UI for AI-powered applications, designing conversational interfaces, agentic workflow visualizations, and user feedback loops that make complex AI accessible.
MLOps & Deployment — Deploy AI agents to production on AWS (Bedrock, SageMaker, Lambda) with monitoring, observability, logging, and cost optimization. Automate CI/CD pipelines using GitHub Actions and Terraform.
Agent Training & Fine-tuning — Train and fine-tune language models for domain-specific tasks, implement prompt engineering strategies, and optimize agent behavior through iterative testing and evaluation.
MCP Integration — Build and integrate Model Context Protocol (MCP) servers for tool-calling, enabling agents to interact with external APIs, databases, and business systems.

Freelance
UI/UX Designer
December 2021 - Present (5 years)

Played crucial role in UI/UX design team creating exceptional user experiences
Led user journey mapping to visualize and enhance navigation flows
Conducted UI/UX training sessions for team members on design principles and best practices
Executed competitor audits to identify industry trends and optimize design strategies
Provided mentorship to junior designers on design systems and workflows

Tech ALPHAlogix
UIUX designer
August 2022 - November 2025 (3 years 4 months)
Gilgit-Baltistan, Pakistan

Played crucial role in UI/UX design team creating exceptional user experiences
Led user journey mapping to visualize and enhance navigation flows
Conducted UI/UX training sessions for team members on design principles and best practices
Executed competitor audits to identify industry trends and optimize design strategies
Provided mentorship to junior designers on design systems and workflows

IPTech

UI/UX Designer

February 2025 - June 2025 (5 months)

Saudi Arabia

Designing wireframes, prototypes, and mockups using Figma to translate user needs into
intuitive interfaces.
• Collaborating with Frontend Engineers to ensure the effective implementation of designs.
• Coordinating with Product Managers and stakeholders to align design outcomes with
business goals.
• Maintaining strict confidentiality regarding proprietary tools, client data, and projectspecific details.

Education

SZABIST University - Islamabad Campus

Bs'computer sciences , Computer Science · (August 2024 - July 2028)
